PROFESSIONAL SUMMARY

Full-stack developer (MERN) moving into AI engineering. Shipped three apps solo, all deployed and still running, plus four months at PTN Events building real CRM features in sprint cycles. Currently building LLM engineering skills: frontier model APIs, tool calling, Hugging Face pipelines, quantization. Hold the Oracle Agentic AI Foundations Associate certification. Built Ariana, a tool-calling Gradio agent with dual Gemini and Llama backends. Co-founded a small digital agency on the side. Looking for AI Engineering, GenAI, or Agentic AI roles that use both halves: production engineering and LLM systems.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), Python, C++, SQL (queries & schema design)

AI / LLM: LangChain, Gemini API, Hugging Face (transformers, pipelines), tool-calling / function-calling, RAG basics, prompt engineering, MCP, agent architecture

Frameworks & Libraries: Node.js, Express.js, React.js, Next.js, Gradio, Tailwind CSS, HTML5, CSS3

Databases: MongoDB, MongoDB Atlas, MySQL

Backend & Security: REST API Design, JWT Authentication, Role-Based Access Control

Cloud & Tools: AWS, OCI, Vercel, Render, Git, GitHub, Postman, VS Code, Cursor IDE, Antigravity IDE

Concepts: Data Structures & Algorithms, OOP, System Design basics, SDLC

CERTIFICATIONS & LEARNING

Oracle Agentic AI Foundations Associate 2026
• Agent architecture (reasoning engine, orchestration loop, tools), LangChain, MCP, OpenAI Agent Stack, OCI enterprise agent deployment.

AWS Certified AI Practitioner (AIF-C01) 2026
• Foundation models and Amazon Bedrock, the SageMaker ML pipeline, prompt engineering, RAG, and responsible AI/security practices on AWS.

PROFESSIONAL EXPERIENCE

Converge Digital India (Remote)
Co-Founder May 2026 – Present
• Led end-to-end delivery on multiple client websites and portfolio builds (React, Next.js, MERN stack) – from sitemap and content architecture through to launch – for small and mid-size business clients.

• Directed a small intern team on AI-driven content strategy for agency clients, producing structured content calendars and creative concepts shipped to production.

PTN Events Vadodara, Gujarat
Software Developer Intern Feb 2026 – May 2026
• Built and maintained features across the full stack using React.js, Node.js, and Express.js. Picked up tasks from sprint boards and shipped them without hand-holding.

• Wrote clean, modular code under senior guidance, debugged issues across frontend and backend, and followed the team's Git branching practices to keep production releases clean.

PROJECTS

Social Media Content Analyzer | GitHub | Live *JavaScript, Node.js, React.js, MongoDB, Gemini AI*
• Designed and shipped a full-stack app end to end: planned the system, built the REST APIs, wired up the frontend, and deployed it on Vercel with MongoDB Atlas as the cloud database.

• Plugged in Google Gemini AI for sentiment analysis and keyword extraction; built an OCR pipeline using Tesseract.js so users can extract and analyze text from uploaded images and PDFs.

HomeEase — Home Services Marketplace | GitHub *JavaScript, Node.js, Express.js, React.js, MongoDB, JWT*
• Built a role-based home services marketplace from scratch, with three user roles (Customer, Provider, Admin), each with its own dashboard, permissions, and workflow enforced via JWT middleware.

• Built the full service discovery and booking flow: search with category, pincode, and price filters, a multi-service cart, checkout with scheduling, and a complete booking lifecycle from pending through confirmed to completed.

Zomato-Reel Video Platform | GitHub | Live *JavaScript, Node.js, React.js, MongoDB, Multer, ImageKit*
• Built backend APIs for video content management and user interactions with Node.js and MongoDB; caught and fixed performance issues that were causing inconsistency across devices.

• Wired up ImageKit for cloud media storage and Multer for file uploads, so users can upload videos and the pipeline handles storage, retrieval, and playback.

EDUCATION

Parul University Vadodara, India
B.Tech in Computer Science & Engineering 2022 – 2026
• CGPA: 7.76/10
